

BLIND FLANGE

Nominal Pressure 6 to 40

Scope of Application

The blind flange having the dimensions of this standard and made of St.37 can be used at maximum 120 °C temperature and with working pressure stated in the table for the nominal temperature. For use at a temperature higher than 120 °C , it should be taken into consideration that the material yield point becomes low.

Form B

Form C

Drawing of a blind flange with its face raised (Form C) for the nominal size 250 and nominal pressure 6, made of St 37.

(Dimensions in mm)

Nominal size in parentheses should preferably be avoided. Screw thread size in parentheses shall not be used for new construction. Material: St 37 of DIN 17100 (For other material, please specify in the order sheet).

St 37-2 for 12 °C to 300 °C temperature; Heat-treated steel for temperature over 300 °C, e.g., C22N or alloyed steel as mentioned for pipes of DIN 17175.
